

EDF sees future in hydrogen fuel, battery storage space

VIKAS SRIVASTAVA
Mumbai, January 14

FRENCH UTILITY MAJOR EDF Energy is exploring business opportunities in the Indian market for electric vehicle (EV) charging infrastructure, hydrogen fuel and battery storage technologies, in line with its plans for the post-Covid-19 economy.

Technologies such as hydrogen fuel and battery storage are in mature stages in France, and the company sees great value for them in the process to decarbonise the energy sector in India.

Harmanjit Nagi, director and country head, EDF India, said they are trying to understand the specific use areas for their technologies in the EV charging infrastructure through their Pulse India programme. "We are also exploring opportunities in the hydro-

EDF is already implementing around five million smart meters in the country as part of the Indian government's drive to convert 250 million conventional meters into smart prepaid meters by 2022

gen fuel market and battery storage space, such as, zinc and molten salt storage since we feel these technologies support the post-Covid-19 economy that is more decarbonised," Nagi said.

EDF is already implementing around five million smart meters in the country as part of the Indian government's drive to convert 250 million conventional meters into smart prepaid meters by 2022.

Nagi said they are looking at several tenders in the smart

metering and distribution segment in Uttar Pradesh, Madhya Pradesh and Tripura. UP is coming out with a tender for one crore smart meters, while Tripura will issue a tender for 1,00,000 smart meters.

The power major has also selected a few Indian start-ups as their "future partners" in India to develop sustainable and resilient smart infrastructure, and e-mobility as part of their incubation programme. The start-up Nunam rehabilitates used batteries to ensure zero cyclic economy; Charge Zone creates EV charging software; Solavio operates and maintains solar plants using efficient robots; while Thermal creates mobile cold storage using PV panels to lease them to farmers.

The start-ups will get an access to various use cases within the EDF R&D centres and their digital platforms.

Farm laws: BKU leader Mann recuses himself from SC panel

PRESS TRUST OF INDIA
Chandigarh, January 14

BHARTIYA KISAN UNION national president Bhupinder Singh Mann on Thursday said he is recusing himself from the four-member committee appointed by the Supreme Court to resolve the deadlock between farmers and the Centre over the new agri-market laws.

Mann's announcement came on a day when his organisation's Punjab unit decided to disassociate itself from him. Farmer unions and opposition parties too had raised doubts over the composition of the panel, insisting that its members have been in favour of the three laws in the past.

Mann said he is thankful to the apex court for nominating him to the panel but would give up any position to prevent farmers' interests from being compromised.

"As a farmer myself and a union leader, in view of the

Mann's announcement came on a day when his organisation's Punjab unit decided to disassociate itself from him

prevailing sentiments and apprehensions amongst the farm unions and the public in general, I am ready to sacrifice any position offered or given to me so as to not compromise the interests of Punjab and farmers of the country," he said in a statement here.

"I am recusing myself from the committee and I will always stand with my farmers and Punjab," said Mann who was also an ex-MP.

The apex court had on Tuesday stayed the implementation of the three central laws till further orders and announced the formation of a committee to hear the grievances of the farmers and the opinion of the government.

BKU (Punjab) president

Baldev Singh Mianpur claimed that Mann might have decided to change his stand after he got a whiff of their meeting.

"We decided to disassociate ourselves from Mann as he did not consult with us to work as a committee member," Mianpur said.

"We thought that farmers were fighting for their rights and they were against any committee and then what was the point in being part of the panel," he said, adding that the decision to disassociate itself from Mann was taken in a meeting held at Khanna.

He said the BKU does not recognise the SC-appointed committee and they are with other farm bodies seeking a repeal of the new farm laws.

Mann, 81, is also the chairman of the All-India Kisan Coordination Committee. He was a Rajya Sabha MP from 1990-96.

He had supported the Congress in 2012 and 2017 Punjab assembly polls.

ICRA: IT firms' revenues to grow up to 9% in FY22

PRESSTRUST OF INDIA
Mumbai, January 14

DEMAND FOR DIGITAL technologies and resumption of normal economic activities will drive sales for IT companies, and the sector will post a revenue growth of up to 9% in 2021-22, a report said on Thursday.

Rating agency IcrA gave a "stable" outlook for the sector, whose size is pegged at over \$180 billion by industry lobby Nasscom, including the business process outsourcing business. The IT services sector's revenues will rise between 7-9% in rupee terms and between 5-8% in dollar terms in 2021-22, it estimated.

The pandemic has dented activities across sectors and the IT business is one of the few isles of growth. All the top IT companies have reported a handsome performance for the third quarter of 2020-21 and make optimistic guidance. Nasscom stopped an over two decade old practice of giving an aspirational growth target for the industry two years ago.

IcrA's vice president Gautav Jain said, "Demand for IT services has been mildly impacted due to Covid-19 on all end-user industries though some sectors like travel/hospitality, retail, oil/gas have been impacted more severely." He said higher adoption of digital services has mitigated the impact to a large extent.

Govt notifies scheme on ethanol production

THE GOVERNMENT ON Thursday notified a "modified" scheme to provide financial assistance to distilleries producing first-generation ethanol from feedstocks, including cereals.

The assistance will be given for capacity expansion, setting up of new ethanol distilleries or converting molasses-based distilleries to dual feedstock.

In a statement, the government said sugar mills, distilleries or entrepreneurs are required to submit an application in a prescribed proforma to the Union Food Ministry within 30 days from the notification for availing the assistance under the scheme.

Sugarcane and ethanol are produced mainly in three states — Uttar Pradesh, Maharashtra and Karnataka. Transporting ethanol to far-flung

states from these three states involves huge transportation cost, it said.

"By bringing new grain-based distilleries in the entire country would result in the distributed production of ethanol and would save a lot of transportation cost and thus prevent delays in meeting the blending target and would benefit the farmers across the country," it added.

Exports of soymeal could more than double as prices rally

RAJENDRA JADHAV
Mumbai, January 14

SOYMEAL EXPORTS COULD more than double in 2020-21 after a rally in global prices to their highest in six-and-a-half years made shipments lucrative for European and Asian buyers, four industry officials told Reuters. Higher exports from India could trim shipments of South American soybean into Asia and also support local soybean prices despite a bird flu outbreak hitting demand from the local feed industry.

India's soymeal exports could jump to more than 2 million tonnes in the 2020-21 year that started on October 1, from 825,000 tonnes shipped the previous year, said Atul Chaturvedi, president of Solvent Extractors Association of India, a mills and refining industry body.

US soymeal futures hit a six-and-a-half-year high this week because of tightening supplies and robust demand from China. "Bird flu in India is affecting local consumption. It is a big opportunity for Indian meal to go out of the country," Chaturvedi said.

Demand for poultry products has fallen in India after bird flu has been reported in 10 states. "Soymeal exports fell last

year as our prices were way above global benchmarks. Indian prices are now competitive as global prices have rallied," said Davish Jain, chairman of the Soybean Processors Association of India (SOPA). Indian exporters were offering soymeal at \$540 a tonne free on board, compared with more than \$550 from South America, dealers said.

India is mainly exporting soymeal to Indonesia, Vietnam, Bangladesh, Nepal and European countries, said Manoj Agrawal, managing director at exporter Maharashtra Oil Extractions.

The country could export about 600,000 tonne of soymeal in January and February despite limited availability of containers slowing shipments, he said.

India exported 599,630 tonne of soymeal in the December quarter, nearly 154% more than a year ago, SOPA said.

Palm oil imports jump 18% in December: SEA

PRESSTRUST OF INDIA
Mumbai, January 14

INDIA'S PALM OIL imports in December went up by 18.38% to 7,48,006 tonne compared to the year-ago month, the Solvent Extractors' Association of India (SEA) said on Thursday.

Palm oil imports during December 2019 had stood at 6,31,824 tonnes, SEA said in a statement.

Import duty reduction crude palm oil (CPO) to 27.5% from 37.5% with effect from November 2 encouraged larger import, SEA added.

The overall import of vegetable oils during December was up 20% at 13,56,585 tonne, compared with 11,28,281 tonne in December 2019. It consisted of 13,28,161 tonne of edible oils and 28,424 tonne of non-edible oils.

December was November-December was up by 9% at 24,59,484 tonne, compared with 22,55,501 tonne in the year-ago period.

Higher imports during December 2020 is an aberration, as it could be due to relocation of CPO to India to beat the impending export levies by Malaysia, the SEA said in a statement.

Indonesia and Malaysia are the major suppliers of palm oil to India.

During November-December, Malaysia was the major supplier of CPO (7,36,180 tonne), followed by Indonesia (5,81,128 tonne), according to data from SEA.

In case of crude soybean degummed oil, India mainly imported this from Argentina (5,51,558 tonnes), while crude sunflower oil was mainly imported from Ukraine (3,84,408 tonne) followed by Russia (64,629 tonnes), the SEA data showed.
